

Regen Agency

Google Ads API Tool - Design Document

Version 1.0 - March 2026 | Confidential

1. Tool Overview

Tool Name: Regen Agency Ads Reporter

Company: Regen Agency (<https://www.regen-agency.com>)

Location: France

Type: Internal reporting dashboard for digital marketing agency

Regen Agency is a digital marketing agency specializing in e-commerce. We manage Google Ads campaigns for multiple clients across various industries. This tool is an internal dashboard that automatically retrieves campaign performance data to generate reports and track ROAS, CPA, and other KPIs for each client.

2. Purpose & Functionality

The tool provides read-only access to the Google Ads API to extract advertising performance metrics for our managed client accounts. It serves as an internal reporting dashboard used exclusively by agency employees.

Key Features:

- Read-only access to Google Ads API (no campaign modifications)
- Retrieves campaign metrics: spend, clicks, impressions, CTR, CPC, conversions
- Daily automated sync via Supabase Edge Functions (serverless)
- Data stored in internal PostgreSQL database (Supabase hosted)
- Dashboard displays ROAS, CPA, AOV per client and per campaign
- Date range filtering for performance analysis
- Attribution table showing revenue per traffic source

3. Google Ads API Usage

API Service: GoogleAdsService.Search (GAQL queries)

API Version: v19

GAQL Query Used:

```
SELECT campaign.id, campaign.name, campaign.status,
       segments.date, metrics.cost_micros, metrics.impressions,
       metrics.clicks, metrics.ctr, metrics.average_cpc,
       metrics.conversions
FROM campaign
WHERE segments.date DURING LAST_7_DAYS
      AND campaign.status != "REMOVED"
```

Operations:

- Read-only: NO campaign creation, modification, or budget changes
- Queries campaign performance data for last 7 days (to capture retroactive conversions)
- Pagination supported (10,000 rows per page)
- Runs daily at 7:00 AM UTC via scheduled cron job
- Can be triggered manually from admin dashboard (rate-limited)

4. Authentication & Access

Authentication Method: OAuth 2.0 with offline refresh token

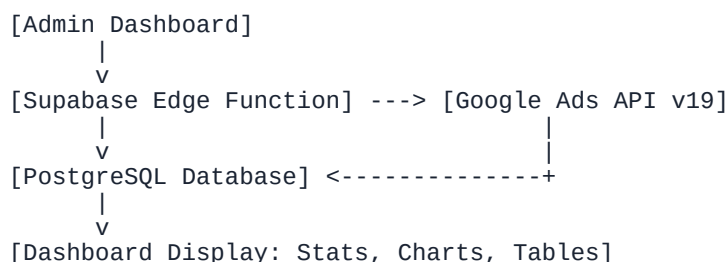

MCC Account ID: 856-137-0062

Access Type: MCC-level access to managed client accounts

The tool authenticates using a refresh token to obtain short-lived access tokens. All API calls are made through the MCC account, accessing individual client accounts via the login-customer-id header.

5. System Architecture & Data Flow

Data Flow:

Components:

- Frontend: HTML/JS admin dashboard (Vercel hosted)
- Backend: Supabase Edge Functions (Deno runtime, serverless)
- Database: PostgreSQL (Supabase managed)
- Tables: ad_accounts, ad_campaigns, ad_daily_metrics, integrations

6. Rate Limiting & Quotas

- Automated sync: maximum 1 sync per client per day
- Manual sync: limited to authenticated admin users only
- Total clients managed: ~10 accounts
- Estimated daily API calls: ~20 requests (2 per client: token refresh + GAQL query)
- Well within Google Ads API Basic Access quota limits

7. Security & Data Protection

- API credentials stored as encrypted Edge Function secrets in Supabase
- No client credentials exposed in frontend code
- Refresh token stored server-side only (never sent to browser)
- Database access protected by Row Level Security (RLS)
- Admin dashboard requires authentication (Supabase Auth)
- All data transmitted over HTTPS
- GDPR compliant: no personal user data collected, only aggregate campaign metrics

8. Users & Access Control

The tool is used exclusively by internal employees of Regen Agency.

- Total users: 2 (agency co-founders)
- Access: Internal only, no external or client-facing access
- Authentication: Email/password via Supabase Auth

9. Supported Campaign Types

- Search campaigns
- Performance Max campaigns
- Display campaigns
- Shopping campaigns

The tool reads performance data from all active campaign types. No campaign creation or modification is performed via the API.
